**FOR IMMEDIATE RELEASE**

**Parkell Launches New TurboSensor®+ Ultrasonic Scaler**  
*Ensures Consistent Performance with all Market-leading 30K Inserts*

**EDGEWOOD, NEW YORK, USA** – [Parkell](#), a recognized global leader in dental materials and equipment manufacturing for over 70 years, is proud to introduce the **new TurboSensor+ ultrasonic scaler**.

“The TurboSensor+ is truly an exceptional scaler,” says David Mott, President of Parkell. “It combines the quality and performance of its decades-trusted predecessor, TurboSensor®, with features that have been highly-requested by our loyal customers, most importantly, enhanced infection control and a truly open platform for other brand inserts.”

Built around a **new IntelliSense™ processor**, the TurboSensor+ ensures top-level, consistent performance with all market-leading 30K inserts. The TurboSensor+ features a **new detachable, autoclavable 30K handpiece** for enhanced reprocessing, cleanliness, and disinfection.

The TurboSensor+ also includes a **new tap-on “purge” mode** for waterline cleansing, a **new “priming” mode** for preparing the handpiece to begin scaling with the first compression of the foot pedal, a streamlined setup with easy to assemble and position components, and a superior water flow system for improved aerosol management.

In addition, because Parkell constantly strives to provide customizable solutions for all dental professionals, the new TurboSensor+ ultrasonic scaler is being offered in a variety of vibrant colors to complement the style and personality of every office (including, **pearl, midnight blue, tangerine, lilac, and electric blue**). As always with Parkell devices, the TurboSensor+ is designed, manufactured, and serviced in the **U.S.A.**
